PROJECTS

Healthcare Data Analysis | *Python, Pandas, NumPy, Matplotlib*

- Performed data analysis on 5,000+ patient records covering demographics, medical conditions, and billing information to identify key patterns and insights.
- Performed data cleaning and preprocessing, handling missing and inconsistent values to improve data accuracy.
- Conducted exploratory data analysis (EDA) to identify trends across age groups and admission types.
- Created 6+ visualizations (bar charts, pie charts, scatter plots) to communicate insights effectively.
- Key finding: 65+ age group contributed to over 40% of total cases; emergency admissions accounted for 30%+.

Sales Performance Dashboard | *Power BI*

- Analyzed sales data of 800+ customers and 1,800+ products to evaluate business performance.
- Built an interactive dashboard with dynamic filters for city, product, month, and year.
- Developed key KPIs including Total Sales (2.3M), Profit (286K), and Customer Count (800).
- Identified Consumer segment contributing 50% of total sales and strong growth trend from 2021 to 2024.

Client Website — Apex Lakhdata | *HTML, CSS, JavaScript, Bootstrap* | apexlakhdata.com

- Developed a fully responsive client website ensuring seamless experience across all devices.
- Enhanced user experience through structured layout, intuitive design, and clean navigation.
- Successfully deployed the website on a live server for real-world usage.
